

FROM THE DESK OF MD

Dear Team,
As we step into September, I am pleased to share that we are moving steadily closer to our larger goals.

Each achievement we make, big or small, brings us one step nearer, and it is your consistent efforts, discipline, and teamwork that are making this possible.

When we are this close, what matters most is maintaining focus, tightening our execution, and keeping the momentum alive.

At the same time, it is encouraging to see the recognition we are receiving in the market and the new opportunities this is creating for us.

Equally, the collaboration and ownership shown across teams have become our biggest strength, giving us the confidence to take on bigger challenges and deliver with consistency.

Let us carry this momentum forward, stay united in our efforts, and close this quarter on a high note.
With Regards,

Dinesh C. Nambiar

LEADERSHIP CORNER

Initiative: The First Step Toward Progress

Great organizations are built not only by ideas from the top but by the initiative shown at every level.

Taking initiative means stepping forward without waiting to be asked — solving a problem, suggesting an improvement, or lending a hand when it's needed.

It often takes courage, because with initiative comes responsibility.

But every small act of initiative adds up, creating momentum that drives the whole team forward.

When each of us is willing to go beyond “what's expected,” we unlock innovation, strengthen collaboration, and inspire others to do the same.

True progress begins when we decide not just to follow, but to lead in our own way.

UPCOMING EVENT

INDIAN ICE CREAM EXPO - 2025

NEW DELHI

DO YOU KNOW

What is Aseptic Processing?

A: Aseptic processing is a method where food or beverage and its packaging are sterilized separately and then combined in a sterile environment.

Why is aseptic processing important?

A: It extends shelf life without refrigeration, maintains natural flavour and nutrition, and ensures safe, high-quality products for consumers.

TECH - SPOTLIGHT

Redefining Creamy Perfection with Cutting Edge Ice Cream Technology

At Repute we design and manufacture state-of-the-art ice cream plants that set new benchmarks for quality and efficiency.

From raw material handling to final packaging, our advanced solutions ensure consistent flavour, smooth texture, and reliable production.

With high-efficiency homogenizers, precise pasteurization units, and innovative freezing technology, our fully integrated systems deliver seamless operation while minimizing energy use and waste.

Built with a deep understanding of industry challenges, our equipment helps dairy producers achieve excellence with every batch.

Together, let's lead the way in creating the finest ice cream products with unmatched efficiency and reliability.

INSPIRING QUOTES

Success is the sum of small efforts, repeated day in and day out. True progress comes not from one big leap, but from consistent dedication over time.

— Robert Collier

EVENT HIGHLIGHTS

Participation in Anuga FoodTec India 2025

We proudly participated in Anuga FoodTec India 2025, held at the Bombay Exhibition Centre, Mumbai, from 20th to 22nd August 2025. The event brought together leading stakeholders from the food and beverage processing industry. At the exhibition, we showcased our innovative processing solutions, engaged with clients and partners, and explored new opportunities in the Indian market. Our presence reinforced our commitment to delivering value-driven, sustainable solutions and strengthening our industry relationships.

FUN CORNER

GAME ON

with

I break things down but never destroy,
I make milk smooth and juices a joy.
Tiny globules I evenly blend,
For better texture and taste till the end.
