FROM THE DESK OF MD

Dear Team Repute,

Every great journey begins with a single bold step

At Drinktec India 2026, we launched RAS Filtration Systems, a new brand built by Repute, A Due of Italy and Sfoggiatech. It brings Italian technology, Indian engineering and local manufacturing together under one promise: "Preserving the essence of every liquid."
Our new Horizontal Leaf Filter drew strong interest all three days.
My heartfelt thanks to every team that made this happen.

This is a new start for Repute. We are no longer only a process equipment maker. We are building a filtration brand that can stand with the best in the world.

As we move through the third quarter, this is the time to build momentum. Let us reaffirm our commitment to every target we set: every order closed, every project delivered on time, every customer delighted.

I have full confidence in this team. We have done it before, and together we will do it again.

Let's carry this momentum forward and make every month count.

With Regards,
Dinesh C. Nambiar

LEADERSHIP CORNER

The Power of Showing Up

Leadership is not just about making big decisions or achieving major milestones. It is about showing up every day with commitment, consistency, and a willingness to take responsibility.

Great leaders understand that progress comes from small, meaningful actions. Supporting a colleague, keeping promises, listening to different perspectives, and staying focused during challenging times all contribute to building a stronger team.

Showing up also means being accountable, learning from mistakes, and encouraging others to do their best. These everyday efforts build trust, strengthen relationships, and create a positive work culture.

Because leadership is not defined by one great achievement, but by the difference we make through our actions every day.

DO YOU KNOW

Q: Did you know that cutting an onion triggers a chemical reaction that makes your eyes water?

Answer: When an onion is cut, its damaged cells release enzymes that react with naturally occurring sulphur- containing compounds. This produces a volatile substance that reaches the eyes and stimulates the nerves responsible for tearing.
The tears help wash away the irritant, making this a natural protective response.

INSPIRING QUOTES

Progress isn't always about taking bigger steps; sometimes, it's about seeing new possibilities in the steps we already take.

OVER 28 YEARS OF INNOVATIVE EXCELLENCE IN FOOD PROCESSING

TIMES NOW ICONS OF FOOD SYSTEMS – EXCELLENCE IN FOOD PROCESSING & PACKAGING

TECH - SPOTLIGHT

RTS Juice Processing Plant

Our Ready-to-Serve (RTS) Juice Processing Plant is engineered to deliver efficient, reliable and consistent juice production. Designed by our expert engineers, the plant integrates modern processing technologies and automation systems to streamline operations while maintaining high standards of product quality, safety and hygiene.

With automated controls and user-friendly interfaces, the plant enables efficient process monitoring, reduces manual intervention and minimizes the risk of operational errors. Its optimized workflows help reduce waste and downtime, while a scalable design allows production capacity to be adapted to changing market demands, supporting efficient and reliable juice manufacturing.

EVENT HIGHLIGHTS

Introducing RAS Filtration Systems

A New Collaboration in Filtration Solutions

Launched at Drinktec India 2026 in Mumbai, RAS Filtration Systems brings together Repute Engineers, ADUE and Sfoggiatech, combining Italian filtration expertise with Indian engineering and local manufacturing.

The collaboration aims to deliver reliable filtration solutions with shorter delivery timelines and responsive after-sales support for the Indian market.

Featured Solution: RASFLOW DE Horizontal Leaf Filter

Designed for applications including sugar syrup, wine, beer and edible oils, the RASFLOW DE Horizontal Leaf Filter brings proven filtration capabilities closer to Indian customers.
